IDENTIFIERS *Elementary Secondary Education Act Title I

ABSTRACT

This report is designed to provide consistent reliable indicators to allow analysis of educational trends in each state over time and to provide high quality data to provide comparable information from state to state. The açcessible indicator formats are designed for increased uses by a variety of audiences. The report contains two-page profiles that report the same indicators for each state. The state profiles focus on the status of each indicator as of the 1999-2000 school year, with a focus on Title I requirements under the 1994 legislation (The report was written before the passage of the No Child Left Behind Act.) The indicators in each state profile are organized into these categories: (1) school and teacher demographics; (2) student demographics; (3) statewide accountability information; (4) Title I schools; (5) National Assessment of Educational Progress results; and (5) student achievement. The report also tracks the progress of state Title I programs and the development and use of state standards in state accountability. Indicators are reported for each state, and District of Columbia, and the entire United States. Appendixes contain state proficiency level definitions, context indicators by state, and definitions and further information. (SLD)

Introduction

Report Objectives and Design

State Education Indicators with a Focus on Title I is designed to provide: 1) consistent, reliable indicators to allow analysis of trends for each state over time, 2) high data quality to provide comparability from state to state, and 3) accessible indicator formats for increased uses by a variety of audiences. The report is based on two-page profiles that report the same indicators for each state.

Guide to State Indicator Profiles

The state profiles that follow are key measures of the quality of K-12 public education in each state. The profiles in this report focus on the status of each indicator as of the 1999-2000 school year, and also include data for a baseline year to provide analysis of trends over time. The data sources section provides more detailed information and explanations for the indicators. It is important to note that the data was collected for this report *before* the No Child Left Behind Act of 2001 was enacted. As a result, the state data reflect Title I requirements under the 1994 legislation.

The indicators in each state profile are organized in five categories:

School and Teacher Demographics
The indicators in this category provide a statewide picture of characteristics of the public K-12 school system, including schools, teachers and finances. The statistics for each state on number of school districts, public schools by grade level, number of charter schools, number of teachers reported by FTEs (full-time equivalents), and public school enrollment are primarily based on data from the Common Core of Data surveys conducted by the National Center for Education Statistics (NCES) from the state departments of education.

Student Demographics
An important aspect of the assessment and evaluation for Title I is the disaggregation of student achievement results by student characteristics, particularly race/ethnicity, poverty, disabilities, English proficiency, and migrant status. This section of the profile provides readers a picture of the size of these student populations in each state. The bar graph showing counts of public schools by percent of students eligible for the free lunch program (i.e., students from families below the poverty level) is useful for reviewing the disaggregated student achievement results reported on the second page of each profile.

Statewide Accountability Information
The information on state accountability systems was compiled from several sources: annual updates collected by CCSSO with each state education agency, review of state Internet web sites, and print reports (Winter 2002). The information provides comparable information on the status of state accountability systems and the relationship to Title I accountability (in cases where States had not yet developed a unitary accountability system, a requirement in the No Child Left Behind Act of 2001). Definitions of the five indicators on state accountability are:

- Statewide Goal for Schools on Student Assessment: As of 2002, 35 states have established a goal, such as percentage of students in a school that will attain the state-defined proficient level on state student assessments in specific subjects (see assessment name and state definition of "proficient" on second page of each profile).
- Expected School Improvement on Assessment: 30 states have set a target for amount of improvement in student achievement scores for the school by a certain time period (e.g., annually).
- Indicators for School Accountability: 50 states have defined one or more indicators that are used in the statewide accountability system or Title I system.
- Title I AYP Target for Schools: 50 states have measures of adequate yearly progress (AYP), as required under Title I. Schools that do not meet their AYP targets for 2 years are identified for improvement. In 18 states the AYP target for school improvement is based on the statewide accountability system, and the report lists "same" for this indicator. If it is different, the Title I target is described. (Statewide AYP measures were required under the 1994 Elementary and Secondary Education Act reauthorization.)

Title I Schools
To offer a focus on Title I, the report includes several specific indicators of Title I programs. These include the number of Title I schools (including schools offering "targeted assistance" to low-income children and schools with high rates of low-income children that use Title I funds to support "schoolwide programs"), the number and percent of Title I schools meeting AYP goals, and the number and percent of Title I schools identified for school improvement. In addition, the report includes the Title I funding allocation per state. States report the data on Title I programs in the State Consolidated Performance Report submitted on an annual basis to the U.S. Department of Education.

National Assessment of Educational Progress
State-level results on the National Assessment of Educational Progress (NAEP), which are comparable state by state, are reported in the lower right corner of the left page of each state's profile. NAEP proficiency definitions are available in Appendix C.

Student Achievement

The name of the state assessment and state definitions of proficient are included at the top of the right page of each state profile. State assessment aggregate scores were obtained from the Consolidated Performance Report (Section B) submitted by states to the U.S. Department of Education.

Each state determines its state test, how levels are set and defined, and the grade at which students are tested. Thus, student achievement scores are not directly comparable state to state. Student results for a state, e.g., percent meeting the state's "proficient" level, can be compared with the same state's performance in the prior year. Definitions of state proficiency levels, when not listed in the profile, are available in Appendix A.

States reported student achievement results for the 1999-2000 school year for mathematics and reading/language arts at three grade levels, as specified by Title I requirements prior to the program's reauthorization in 2002: Elementary—grade 3, 4 or 5; Middle—grade 6, 7, 8 or 9; and High—grade 10, 11, or 12. *State Education Indicators* provides disaggregated assessment results for states reporting by schools with Title I programs, school percent of students from low income families, limited English proficient students, and migrant students. The availability of results by other student characteristics are listed in the Student Achievement by Category table on page xii.

The "student achievement trend" at the bottom of the right page of each profile shows a histogram with the percent of students in different school categories that meet or exceed the state definition of "proficient." Histograms are displayed for four states with 1996-97 as their baseline year for analysis, and six states with 1995-96 as their baseline year. In order for a trend to be reported for multiple years, a state must disaggregate by school poverty level, use the same assessment tool and keep the same definition of proficient. Changes in these assessment characteristics disqualify a state from having a trend analysis. In the bottom right corner of the right page are reported two measures of student outcomes from secondary schools—the high school dropout rate (based on annual percent of grade 9-12 students leaving school or "event rate") and the postsecondary enrollment rate (percent of high school graduates enrolled in any postsecondary education institution in the fall of the following school year).

Progress of State Standards and Assessments

This report tracks the progress of state Title I programs, and particularly the development and use of state standards and assessments in state accountability. A goal of the annual report is to chart the progress of states in developing state accountability systems based on state content standards and aligned state assessment programs.

Title I is the largest single grant program of the U.S. Department of Education. For over 30 years, it has earmarked funds for states to provide additional educational support for the neediest children in all 50 states and the outlying territories. Twenty-seven percent of schools with more than 75 percent of their students living in poverty receive some level of Title I funds. Schools with greater than 50 percent poverty were eligible (prior to the 2001 reauthorization) to become a "schoolwide" program which allows funds to be distributed throughout the entire school. Effective in 2002-2003, schools with greater than 40 percent poverty may operate schoolwide programs. Targeted programs channel funds directly to the neediest students.

The 1994 reauthorization of the Elementary and Secondary Education Act (ESEA) required states to monitor the progress of schools in improving the achievement of low-income students, and also required alignment of student achievement tests with state standards for learning that apply to all students. The No Child Left Behind Act, which reauthorized ESEA in 2001, strengthens these requirements and adds a requirement for testing of all students in grades 3-8 and one grade in the 10-12 grade span, by 2005-2006. The individual state profiles and trends in assessment results in the *State Education Indicators* report are useful for initial determinations of educational improvements that may be related to Title I programs. The 50-state matrix on pages x-xi displays key indicators of state progress in developing accountability systems for Title I.

1. *Content Standards*

   As of Spring 2002, 49 states plus the District of Columbia and Puerto Rico had completed and implemented content standards for K-12 education in the core academic subjects of English/language arts and mathematics, and 46 states had completed and implemented standards for science and social studies/history. The No Child Left Behind Act requires that all states have content standards in mathematics and English/language arts and in science by the 2005-2006 school year.

2. *State Assessment Results reported by Proficiency Levels*

   For the 1999-2000 school year, 42 states plus the District of Columbia and Puerto Rico reported state assessment results using three or more proficiency

levels that were defined by the state. The matrix on the Standards and Assessments page identifies the name of each assessment instrument and the year in which the proficiency levels were set by the state.

3. *State Achievement Results Disaggregated*

   A key feature of the 1994 reauthorization was a provision that assessment results be disaggregated by characteristics of schools and students. This requirement is retained in the No Child Left Behind Act of 2001. The purpose of disaggregated results and reporting is to increase the possibility that educators and policymakers will analyze and improve the progress of learning through focusing on the students that are most in need of assistance. Under NCLB requirements, states are required by 2002-03 to disaggregate and report state assessment results by school and by students with families in poverty, student race/ethnicity, gender, and student status as disabled, limited-English proficient, and migratory. For the 1999-2000 school year, 40 states plus the District of Columbia and Puerto Rico reported assessment results using one or more disaggregated categories.

4. *Assessment Trends Analysis*

   As of 1999-2000, 9 states had reported at least two years of assessment results using consistent assessments, levels, and grades; and 5 states reported three or more years of results that could be analyzed as trends.

Sample State Trends Analysis

The following is an example of trend analysis in student achievement using data from North Carolina's assessment program. This sample examines the extent of gains in language arts/reading and mathematics from 1997 to 2000 using consistent data from four years of assessment results, based on the same test with results reported by proficiency levels and disaggregated by school poverty level.

End of Grade Test—Grade 4

Reading Level 3 and higher

	1997	2000	Gain
All Students	68%	72%	**4%**
Students in High Poverty Schools	49%	54%	**5%**

Math Level 3 and higher

	1997	2000	Gain
All Students	75%	85%	**10%**
Students in High Poverty Schools	57%	73%	**16%**

Test–CRT; levels set in 1992
North Carolina Level 3: Students performing at this level consistently demonstrate mastery of grade level subject matter and skills and are well prepared for the next grade level.

In both Reading and Mathematics, a disparity in achievement is evident between schools with few low-income students and schools with many low-income students. For example, the average school has 85 percent of students above Level 3 in mathematics, while high-poverty schools have 73 percent above this level. Mathematics results have improved significantly since 1997 in high-poverty schools—a gain of 16 percentage points on Math Level 3 (i.e., proficient). Improvement in reading in high-poverty schools is also above the rate of improvement for all students.

Across all North Carolina elementary schools, nearly three-quarters of students are at or above the expected levels of performance in mathematics and reading. In schools with high concentrations of low-income children, over 70 percent of students are proficient in math and 54 percent of students are proficient in reading.

North Carolina's accountability system and levels have been in place since 1992. A small percentage of students were excluded from testing in grade 4 reading and math due to exemptions for disabilities and English proficiency.

The progress of North Carolina students in mathematics as measured on NAEP is consistent with the progress of students on the state assessment during the period 1996 to 2000. For example, the percentage of low-income fourth grade students at or above the basic mathematics level on NAEP improved 16 percentage points over four years from 1996 to 2000 (from The Nation's Report Card: State Mathematics 2000, Report for North Carolina, U.S. Department of Education, Office of Educational Research and Improvement, 2001). Mathematics gains in high poverty schools—those with at least 75% of students eligible for Title I assistance—on the state assessment

showed a similar 16 percentage points gain at Level 3 from 1997 to 2000.

Uses of State Indicators

This report comes at an important time for states, schools, and students. Standards and assessments are at the center of education reform in the states and are a central focus of the No Child Left Behind Act (NCLB). Schools are working with Title I programs to develop new approaches to education for low-income and at-risk students. An important goal of these efforts is to close the gap in educational opportunity and student learning between poor and wealthier students. For anyone tracking information about student achievement in the states, *State Education Indicators with a Focus on Title I* can be a useful tool on several fronts:

Policy Information: This is the only published report that summarizes state assessment results by state using a common format and a consistent method of reporting scores over time. As states have met the Federal Title I requirements for reporting on student achievement, and prepare to meet the NCLB requirements, this report provides a central resource for examining trends in improvement of scores and reviewing differences in progress by student characteristics, such as school poverty level. The report also allows state policymakers to see the status of key indicators for comparable states in size, budget, and region. National policymakers have a convenient source for state-by-state statistics, outcomes, programs, and demographics, as well as national totals for comparison.

Data: The report has provided five years of consistent, reliable data on a range of indicators at the state level. The outcome is a convenient and comprehensive data source for research and analysis of achievement and other outcomes not only in relation to state program characteristics, such as per pupil expenditures and student:teacher ratio, but also to state demographic context characteristics, such as poverty level and parents' education. The on-line version of this publication allows for even further analysis: CCSSO is developing an electronic database that will provide users with the opportunity to access data by state or by variable to construct graphs or tables using additional statistical measures and policy variables.

Monitoring Accountability Systems: As states developed statewide accountability systems that went beyond the requirements for Title I under the 1994 ESEA law, *State Education Indicators* has tracked key information on the differences in definitions of accountability, types of indicators reported, and school and district objectives for improvement. Now, the NCLB Act requires that all states have accountability reporting for each school and district. In this and subsequent editions, *State Education Indicators* will continue to provide a snapshot of the state's development of accountability systems, focusing on key system characteristics such as adequate yearly progress (AYP) starting points, performance levels, objectives for improvement, additional indicators, and percent of students assessed.

State Education Indicators with a Focus on Title I can serve to provide convenient snapshots for policymakers, educators, business leaders, parents, and anyone in a state working toward increasing the achievement of all students. In addition, when considered in context with other factors, it can be a barometer of the success of statewide efforts to meet the goal of federal and state legislation and policies, which work together with the aim of ensuring that all children receive a high quality education. As states work to meet the requirements of No Child Left Behind, later editions of *State Education Indicators* will be a useful tool in judging states' success.

Acknowledgments

The Council received valuable contributions from many organizations and individuals in preparing the 2000 State Education Indicators report. We consider the report a collaborative effort.

We received strong support from chief state school officers, state assessment directors, and state Title I directors for the idea of a 50-state report profiling key statewide education indicators and indicators of progress of Title I programs. States provided excellent cooperation in reporting not only the state assessment data required under Title I, but also further details about state assessment programs and student demographics that provide the context for analyzing assessment results. State education staff carefully reviewed the data in the state profiles and provided important suggestions for improving the report, and we thank them for their continued assistance which makes the profiles possible.

Funding support for the *State Education Indicators* report was provided under a task order from the U.S. Department of Education, Planning and Evaluation Service. We very much appreciate the guidance and assistance provided by staff in the Planning and Evaluation Service, including Daphne Hardcastle, Meredith Miller, and Elois Scott, as well as staff in the Office of Compensatory Education Programs, including Chuck Laster, Mary Moran, and Zollie Stephenson. The National Center for Education Statistics provided access to data files from the Common Core of Data, NAEP, and Schools and Staffing Survey, and we particularly thank John Sietsema for his assistance. The database for the state profiles was developed in collaboration with Westat, Inc., and we appreciate the efforts of Beth Sinclair, Nina Blecher, and Babette Gutmann in data collection and project support.

The design files were originally created by Anastasia Miller. The data were proofed by Doreen Langesen, Abigail Potts, and Andra Williams. The state assessment directors reviewed the profiles and proofed the state assessment data. The EIAC subcommittee on assessment, co-chaired by Sally Tiel (Idaho) and Louis Fabrizio (North Carolina), reviewed the design.

An expert advisory panel guided CCSSO in selecting the indicators as well as assisting in refining the report design. The panel members are: Wes Bruce (Indiana), Helmuts Feifs (North Carolina), Steve Fleishman (Education Quality Institute), Ellen Forte-Fast (American Institutes for Research), Mike Garet (American Institutes for Research), Paula Girouard (Massachusetts), Christine Padilla (SRI), Gerald Richardson (Florida), Beth Sinclair (Westat), Richard Wenning (New American Schools), Carole White (Delaware), and Phoebe Winter (CCSSO).

Summary of Student Performance 1999-2000

Table 3: Summary by State of Students at Proficient Level or Higher, by State Definition

State	Elementary Reading	Elementary Math	Middle School Reading	Middle School Math	State Term for Proficient*
Alabama	64%	70%	64%	72%	Proficient
Alaska	79%	81%			Proficient
Arizona	71%	53%	52%	18%	Meets Standard
Arkansas	47%	41%	24%	16%	At or Above Proficient
California	47%	54%	50%	49%	At or Above 50th Percentile
Colorado	60%		62%	33%	Proficient
Connecticut	57%	60%	66%	55%	No levels defined (Band 4 reported)
Delaware	77%	72%	68%	41%	Meets Standard
District of Columbia	32%	33%	30%	15%	Proficient
Florida	58%	51%	46%	57%	Proficient
Georgia	65%	62%	65%	54%	Meets Standard
Hawaii	65%	64%	54%	61%	Proficient
Idaho	62%	45%	56%	49%	Level III
Illinois	62%	69%	72%	47%	Meets Standards
Indiana	65%	73%	78%	60%	Level II
Iowa	67%	71%	70%	74%	Intermediate
Kansas	62%	62%	66%	53%	Satisfactory
Kentucky	57%	31%	51%	25%	Proficient/Distinguished
Louisiana	16%	12%	15%	8%	Proficient
Maine	45%	23%	46%	21%	Meets Standard
Maryland	40%	41%	27%	53%	Satisfactory
Massachusetts	20%	40%	62%	34%	Proficient
Michigan	58%	75%	49%	63%	Satisfactory
Minnesota	45%	47%	80%	72%	Level 3/Passing
Mississippi	50%	48%	50%	46%	No levels defined (Mean NCE)
Missouri	32%	37%	32%	14%	Proficient
Montana[1]					No data available for 99-00
Nebraska	54%	58%	59%	64%	Proficient (Title I students only)
Nevada	47%	52%			Proficient
New Hampshire	38%	40%	29%	27%	Proficient

*Please see each state's profile for the state's definition of proficient and higher.

[1]A variety of tests were used throughout the state, making consistent statewide student proficiency scores unavailable.

State	Elementary Reading	Elementary Math	Middle School Reading	Middle School Math	State Term for Proficient*
New Jersey	55%	66%	75%	60%	Proficient
New Mexico					Level III
New York	53%	65%	45%	41%	Level III
North Carolina	72%	85%	83%	80%	Level 3
North Dakota	78%	75%	73%	76%	Proficient
Ohio	58%	49%	53%	54%	Passing
Oklahoma	46%	78%	71%	65%	Level 3
Oregon	73%	65%	51%	48%	Meets Standard

Statewide Accountability Information

(Collected from States, January 2002 for 2001-2002 school year)

Statewide Goal for Schools on State Assessment
>50 percent of students at or above 40th percentile on NRT (Reading, Language Arts, Math, Science, Social Studies)

Expected School Improvement on Assessment
Two percent gain per year for schools not attaining Proficient level (Academic Clear). Academic Alert schools required to improve 5 percent/year.

Indicators for School Accountability
Test scores

Title I Adequate Yearly Progress (AYP) for Schools
Same as statewide goal

Title I 1999-2000	Schoolwide Programs	Targeted Assistance	Total
Number of Schools	571 70%	244 30%	815 100%
Schools Meeting AYP Goal	516 90%	239 98%	755 92%
Schools Identified for Improvement	55 10%	5 2%	60 7%

(ED Consolidated Report, 1999–2000)

Title I allocation $136,377,511
(Includes Basic, Concentration, and LEA grants, Capital Expenditures, Even Start, Migrant Education, and Neglected & Delinquent, ED, 1999–2000)

Statewide Accountability Information

(Collected from States, January 2002 for 2001-2002 school year)

Statewide Goal for Schools on State Assessment
Above 40 on 100 point performance index (3 subjects) based on a 2-year weighted average and two-year performance trend relative to the state average performance trend.

Expected School Improvement on Assessment
Sufficient progress (index above 40) within three years.

Indicators for School Accountability
Grades 4, 6, and 8 CRT scores reading, writing and mathematics; grade 10 CRT scores mathematics, science, writing across the disciplines, and reading across the disciplines.

Statewide Accountability Information

(Collected from States, January 2002 for 2001-2002 school year)

Statewide Goal for Schools on State Assessment
All students will read independently and use math to solve problems at grade level; experience a year of growth for a year of instruction; have an educational plan leading them to being prepared for success.

Expected School Improvement on Assessment
Each school is required to develop a school improvement plan including goals based on academic objectives for all students and strategies to accomplish these goals. In development: all schools will be assigned an improvement target.

Indicators for School Accountability
Family involvement, continuous improvement, performance management systems, professional development, extended learning opportunities, arts, advanced coursework.

Title I Adequate Yearly Progress (AYP) for Schools
Close gap for school 10 percent between high and low gain per year in level.

Statewide Accountability Information

(Collected from States, January 2002 for 2001-2002 school year)

Statewide Goal for Schools on State Assessment
Grades 4, 6: 75 percent or above of students proficient; grade 9: 75 percent or above of students proficient; grade 10: 85 percent or above

Expected School Improvement on Assessment
2.5 percent point gain on two-thirds of performance indicators not met the previous year; progress toward higher level

Indicators for School Accountability
Graduation, attendance rates, state proficiency tests in reading, mathematics, science, citizenship, writing

Title I Adequate Yearly Progress (AYP) for Schools
2.5 percent point gain from previous year on 4th and 6th grade test, reading and mathematics, or 75% proficient.

Race/ethnicity (CCD, K–12)	1993–1994	1999–2000
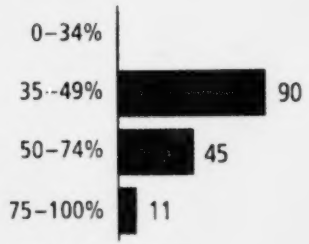
American Indian/Alaskan Natives	2,711 3%	2,715 3%
Asian/Pacific Islander	736 1%	772 1%
Black	1,008 1%	967 1%
Hispanic	6,242 6%	6,253 7%
White	90,202 89%	81,594 88%
Other	n/a —	n/a —
Students with disabilities (OSEP)	10,055 10%	11,054 12%
Students with Limited English proficiency (ED /NCBE, K–12)	1,938 2%	2,253 2%
Migrant (OME, K–12)	483 *	n/a —

All schools by percent of students eligible to participate in the Free Lunch Program†
(CCD, 1999–2000)



† 13 schools did not report.

Statewide Accountability Information

(Collected from States, January 2002 for 2001-2002 school year)

Statewide Goal for Schools on State Assessment
District accreditation: districts set performance standards

Expected School Improvement on Assessment
None

Indicators for School Accountability
CRT (WyCAS) scores, total and sub groups—LEP, low-income, disabled, migrant, mobility

Title I Adequate Yearly Progress (AYP) for Schools
Annual growth to close gap to 100% proficient in 10 years, total and for each subgroup

Title I 1999-2000	Schoolwide Programs	Targeted Assistance	Total
Number of Schools	42 30%	98 70%	140 100%
Schools Meeting AYP Goal	36 86%	61 62%	97 69%
Schools Identified for Improvement	3 7%	14 14%	17 12%

(ED Consolidated Report, 1999–2000)

Title I allocation $18,874,656
(Includes Basic, Concentration, and LEA grants, Capital Expenditures, Even Start, Migrant Education, and Neglected & Delinquent, ED, 1999–2000)

NAEP State Results

	Grade 4	Grade 8
Reading, 1998:		
Proficient level and above	30%	29%
Basic level and above	65%	76%
Math, 2000:		
Proficient level and above	25%	25%
Basic level and above	73%	70%

Sources

School and Teacher Demographics

Expenditures per pupil

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, National Public Education Financial Survey, School Year 1998–1999. Current expenditures per pupil as reported by school districts.

Note: Current expenditures include salaries, employee benefits, purchased services, and supplies, but exclude capital outlay, debt service, facilities acquisition and construction, and equipment.

Number of districts

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1999–2000

Notes: All local school districts are included in these counts. Separate supervisory unions, regional education services agencies, and state-operated institutions are excluded.

Number of Charter Schools

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1999–2000

Notes: All state-defined charter schools are included in these counts.

Number of public schools in state

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1999–2000

Notes: School counts based on NCES definitions in Digest of Education Statistics. Schools are broken into five categories: Elementary, Middle, High, Combined, and Other. A school is classified as combined if it provides instruction at both the elementary (grade 6 or below) and the secondary (grade 9 or above) levels.

Number of FTE Teachers in state

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1999–2000

Notes: Teacher counts based on NCES definitions in Digest of Education Statistics. Schools are broken into five categories: Elementary, Middle, High, Combined, and Other. A school is classified as combined if it provides instruction at both the elementary (grade 6 or below) and the secondary (grade 9 or above) levels.

Public school enrollment

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1993–1994 and 1999–2000

Notes: These numbers do not include ungraded students. Public Preschool Enrollment is recorded according to state definition of public preschools and state decision on data collection.

Sources of funding

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, National Public Education Financial Survey, 1998–1999 school year

Notes: Information is shown for three major revenue sources: Federal, State, and Local. A fourth category, Intermediate, is shown only for those states which have funds in this category.

Student Demographics

Race/ethnicity of K–12 students

Source: U.S. Department of Education, Office for Civil Rights, State Summaries of Elementary and Secondary School Civil Rights Survey and the National Center for Education Statistics, Common Core of Data, 1993–1994, 1999–2000

Students with disabilities (K–12)

Source: U.S. Department of Education. Office of Special Education Programs. 2000.

U.S. Department of Education. To Assure the Free Appropriate Public Education of All children with Disabilities. Seventeenth Annual Report to congress on the Implementation of the Individuals with disabilities Education Act, 1995.

Notes: The figures shown represent children ages 6 to 17 served under IDEA, Part B.

Limited English Proficient (K–12)

Source: U.S. Department of Education, National Clearinghouse for Bilingual Education. 1993–1994, 1999–2000

Notes: The number of LEP students enrolled in public schools.

Migrant (K–12)

Source: U.S. Department of Education, Office of Migrant Education, with state edits and by state definition for the 1999–2000 school year, 1993–94, 1999–2000

Notes: The criterion for migrant status was reduced from six to three years in 1994. Data will only be tracked from that point forward. The figures shown represent the "12-month" count of students identified for the Migrant program. The 12-month count is the unduplicated number of eligible children ages 3-21 who, within three years of making a qualifying move, resided in the state for one or more days during the reporting period.

All schools by percent of students eligible for the Free Lunch Program

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1999–2000

Notes: The figures shown represent the percentage of students eligible to participate in the Free Lunch Program under the National School Lunch Act. This does not include those eligible only for reduced-price lunch.

Statewide Accountability Information

Source: Results from an unpublished 50 State–Survey conducted by CCSSO January 2002. Rolf Blank et al. For more information, visit the state's web page or contact CCSSO at rolfb@ccsso.org or 202.488.5505.

Title I Schools

Source: Sinclair, B. State ESEA Title 1 Participation Information for 1999-2000: Final Summary Report. (Rockville, MD: Westat). Report prepared for the Office of the Under Secretary and the Office of Elementary and Secondary Education, U.S. Department of Education. July, 2002.

NAEP State Results

Source: NAEP 2000 Mathematics Report Card for the Nation and the States. U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress, 2001.

Donohue, P.L., Voelkl, K.E., Campbell, J.R., and Mazzeo, J.; NAEP 1998 Reading Report Card for the Nation and the States. U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress, 1999.

Notes: Data reported for public schools only. Some states did not satisfy one of the guidelines for school sample participation rates. See Appendix C for further information and definitions of proficient and basic.

Student Achievement

Student achievement

Source: State Departments of Education, assessment results for 1999–2000 school year, reported in Consolidated Performance Report, Section B, U.S. Department of Education

Notes: Trend results for 1995–96 through 1999–2000 reported in bar graphs for states with consistent tests over two or more years.

High school drop-out rate (annual)

Source: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, 1993–94, 1997–98

Notes: Only states whose definitions complied with NCES's definition were included. Annual or "event" rate is the percentage of 9–12 students dropping out during one school year. (1998–99 most recent year available.)

Postsecondary enrollment

Source: U.S. Department of Education, National Center for Education Statistics, Residence and Migration of First-Time Freshmen Enrolled in Higher Education Institutions, Fall 1994 and Fall 1996; Common Core of Data; and Private School Universe Survey.

Notes: 1998-99 most recent year available.

Appendix A

Further State Proficiency Level Definitions

Colorado

Proficient: Students understand directions, recognize author's point of view, explain reaction, define problem or solution, make predictions and draw conclusions, differentiate among printed materials, discriminate among various media, extract information from complex stimulus, identify character's reactions/motives, identify sequence, support opinion, classify familiar vocabulary, and interpret poetry in a concrete manner.

Connecticut

Grade 4

Reading Score Band 3: Scores in this band are at or above the statewide goal for reading. Students who score in this range possess the knowledge and skills necessary to successfully perform the tasks and assignments appropriately expected of fourth graders with minimal teacher assistance. Generally students who score in this range can comprehend textbooks and other materials typically used at grade four or above.

Math Score Band 4: Scores in this band are at or above the statewide goal for mathematics. Students who score in this range possess the knowledge and skills necessary to perform the tasks and assignments expected of fourth graders with minimal teacher assistance. Generally, these students demonstrate well-developed computational skills, conceptual understandings and problem-solving abilities.

Grade 8

Reading Score Band 3: Scores in this band are at or above the statewide goal for reading. Students who score in this range possess the knowledge and skills necessary to successfully perform the tasks and assignments appropriately expected of eighth graders with minimal teacher assistance. Generally, students who score in this range can comprehend textbooks and other materials typically used at grade eight or above.

Math Score Band 4: Scores in this band are at or above the statewide goal for mathematics. Students who score in this range possess the knowledge and skills necessary to perform the tasks and assignments expected of eighth graders with minimal teacher assistance. Generally, these students demonstrate well-developed computational skills, conceptual understandings and problem-solving abilities.

Grade 10

Reading Score Band 3: Scores in this band are at or above the response to literature standard. Students at this level have demonstrated perceptive and insightful comprehension of the text. They have presented their interpretation of the text and have supported it by making connections between the text and other experiences or sources. Students at this level have also demonstrated the ability to apply the conventions of English.

Math Score Band 4: Scores in this band are at or above the goal for mathematics. Students who score in this range have demonstrated a strong understanding of the concepts and skills expected of Connecticut high school students. These students have the problem solving abilities required to apply what they know to complex problems and effectively communicate their understanding.

Florida

Level 4: Performance at this level indicates that the student has success with the challenging content of the Sunshine State Standards. A Level 4 student answers most of the questions correctly but may have only some success with questions that reflect the most challenging content.

Level 5: Performance at this level indicates that the student has success with the most challenging content of the Sunshine State Standards. A Level 5 student answers most of the test questions correctly, including the most challenging questions.

Idaho

Reading: Students identify ideas and information suggested by, but not explicitly stated in the text that they read.

Mathematics: Students show evidence of mastery of mathematical concepts and procedures in the content/process areas of the test and demonstrate the ability to solve real-world mathematical problems.

Iowa

Grade 4 Reading

Intermediate: Understands some factual information; sometimes can draw conclusions and make inferences about the motives and feelings of the characters; and is beginning to be able to identify the main idea, evaluate the style and structure of the text, and interpret nonliteral language.

Grade 4 Mathematics

Intermediate: Is beginning to develop an understanding of most math concepts and to develop the ability to solve complex word problems, use a variety of estimation methods, and interpret data from graphs and tables.

Grade 8 Reading

Intermediate: Understands some factual information; sometimes can draw conclusions; make inferences about the motives and feelings of characters; and apply what has been read to new situations; and sometimes can identify the main idea, evaluate the style and structure of the text, and interpret nonliteral language.

Grade 8 Mathematics

Intermediate: Is beginning to develop an understanding of most math concepts and to develop the ability to solve complex word problems, use a variety of estimation methods, and interpret data from graphs and tables.

Grade 11 Reading

Intermediate: Understands some factual information; sometimes can make inferences about the characters; identify the main idea, and identify author viewpoint and style; occasionally can interpret nonliteral language and judge the validity of conclusions.

Grade 11 Mathematics

Intermediate: Is beginning to develop the ability to apply a variety of math concepts and procedures, make inferences about qualitative information, and solve a variety of novel, quantitative reasoning problems.

Missouri

Communication Arts

Proficient: In reading, students compare and contrast; interpret and use textual elements; predict; draw inferences and conclusions; determine word meaning; identify synonyms and antonyms; identify main idea and details. In writing, they use some details and organization; write complete sentences; generally follow rules of standard English.

Grade 4 Mathematics

Proficient: Students communicate math processes; add and subtract common fractions and decimals (money only); use standard units of measurement; identify attributes of plane and solid figures; create

08

and interpret data from graphs; recognize, extend, and describe pictorial or numeric patterns; apply strategies to solve multi-step and logic problems.

Grade 8 Mathematics

Proficient: Students communicate math processes; recognize transformations; solve problems using units of measurement; interpret data from multiple representations; extend and describe patterns and relationships using algebraic expressions; develop and apply number theory concepts; use inductive and deductive reasoning to solve problems.

Grade 10 Mathematics

Proficient: Students communicate math processes; usually analyze and evaluate information; estimate; recognize reasonableness; identify needed information; make predictions; find probability; identify various representations of data; represent situations algebraically; apply properties of real numbers; use multiple strategies to solve problems.

New Hampshire

Grade 3 Reading/Language Arts

Proficient: Students at this level demonstrate an overall understanding of the materials they read, hear, and view. They are able to identify main ideas and draw conclusions. Their responses show thought and are supported with some detail. When writing, they communicate competently and are able to adequately develop and support their ideas. Although they demonstrate a firm grounding in the mechanics of written expression, they may make errors in spelling and grammar. However, these do not interfere with a reader's ability to understand the text.

Grade 3 Mathematics

Proficient: Students at this level are able to estimate and compute solutions to problems and communicate their understanding of mathematics. They can, with reasonable accuracy, add three-digit whole numbers; subtract any two-digit numbers; and multiply whole numbers up to five. They are able to: demonstrate an understanding of place value as well as the relationship between simple fractions and decimals; read charts and graphs; make measurements; and recognize and extend patterns.

Grade 6 Reading/Language Arts

Proficient: Students at this level demonstrate an overall understanding of literary, narrative, factual, informational, and practical works. They extract main ideas, analyze text, evaluate and organize information, draw conclusions, and make inferences and interpretations. They critically evaluate materials they read, hear, and view. They effectively organize, develop, and support ideas so that a reader can easily understand the intent of their writing. They demonstrate a firm grounding in the mechanics of written expression; however, they may still make some errors.

Grade 6 Mathematics

Proficient: Students at this level demonstrate an overall understanding of mathematical concepts and skills. They make few, if any, errors in computation. They use tables and graphs to organize, present, and interpret data. They employ appropriate strategies to solve a wide range of problems. They clearly communicate their solutions and problem-solving strategies.

Grade 10 Reading/Language Arts

Proficient: Students at this level demonstrate a solid understanding of a wide range of literary, narrative, factual, informational, and practical works. They make meaningful connections between and among ideas and concepts in materials they read, hear, and view. They evaluate and organize information, make and communicate informed judgments, and provide evidence for inferences and interpretations. Their writing is clear, logical, and shows evidence of fluency and style. They effectively control the mechanics of language including spelling, capitalization, grammar, and punctuation.

Grade 10 Mathematics

Proficient: Students at this level demonstrate a solid understanding of mathematical concepts and skills. Their work displays a high degree of accuracy. They make meaningful connections among important concepts in algebra, geometry, measurement, and probability and statistics. They identify and use appropriate information to solve problems. They provide supporting evidence for inferences and solutions. They communicate mathematical ideas effectively, with sufficient substance and detail to convey understanding.

New York

Grade 4 English/Language Arts

Level III: Students demonstrate understanding of written and oral text with some meaning beyond the literal level. They can gather information, make inferences, identify theme or main idea, understand character actions, and make connections between two related texts, providing some supporting information. Student's writing is generally focused and organized, with minor errors in spelling, grammar, or punctuation that do do not interfere with readability.

Grade 8 Reading/Language Arts

Level III: Students whose partial understanding is somewhat beyond the literal level of intermediate level written and oral text. They can infer, predict, draw some conclusions, categorize ideas, and make connections between texts, using some relevant support. Writing on intermediate level topics is generally organized and developed, with appropriate vocabulary, some variety in sentence structure, and some sense of voice; minor errors in spelling, grammar, or punctuation do not interfere with comprehension.

Grade 4 Mathematics

Level III: Students consistently solve multistep problems; identify odds/evens; order fractions; use manipulatives to model decimal relationships; identify percent; collect, organize, display, and interpret real-world data; use appropriate units of measure; identify points, lines, rays, planes, polygons; identify faces of solid figures; express probability; extend a numerical pattern; justify a reasonable solution.

Grade 8 Mathematics

Students consistently use prime numbers, factors, multiples; understand decimals, rational numbers, roots, order of operations, congruence, similarity; apply formulas, ratio, proportion; visualize, represent, and transform 3D shapes; evaluate data from graphical displays; estimate time, distance, capacity, area; use a protractor; understand and use Pythagorean theorum, trigonometic functions.

Wyoming

Proficient: Students at the proficient performance level use concepts and skills to acquire, analyze, and communicate information and ideas.

Appendix C

National Assessment for Educational Progress—Definitions and Further Information*

Mathematics Achievement Levels–Grade 4

Basic Fourth-grade students performing at the basic level should show some evidence of understanding the mathematical concepts and procedures in the five NAEP content strands. Fourth graders performing at the basic level should be able to estimate and use basic facts to perform simple computations with whole numbers; show some understanding of fractions and decimals; and solve some simple real-world problems in all NAEP content areas. Students at this level should be able to use—though not always accurately— four-function calculators, rulers, and geometric shapes. Their written responses are often minimal and presented without supporting information.

Proficient Fourth-grade students performing at the proficient level should consistently apply integrated procedural knowledge and conceptual understanding to problem solving in the five NAEP content strands. Fourth graders performing at the proficient level should be able to use whole numbers to estimate, compute, and determine whether results are reasonable. They should have a conceptual understanding of fractions and decimals; be able to solve real-world problems in all NAEP content areas; and use four function calculators, rulers, and geometric shapes appropriately. Students performing at the proficient level should employ problem-solving strategies such as identifying and using appropriate information. Their written solutions should be organized and presented both with supporting information and explanations of how they were achieved.

Note The following states did not satisfy one of the guidelines for school sample participation rates: Alaska, Arkansas, Iowa, Michigan, Montana, Nevada, New Jersey, New York, Pennsylvania, South Carolina, and Vermont.

Mathematics Achievement Levels–Grade 8

Basic Eighth-grade students performing at the basic level should exhibit evidence of conceptual and procedural understanding in the five NAEP content strands. This level of performance signifies an understanding of arithmetic operations—including estimation—on whole numbers, decimals, fractions, and percents. Eighth graders performing at the basic level should complete problems correctly with the help of structural prompts such as diagrams, charts, and graphs. They should be able to solve problems in all NAEP content strands through the appropriate selection and use of strategies and technological tools—including calculators, computers, and geometric shapes. Students at this level also should be able to use fundamental algebraic and informal geometric concepts in problem solving. As they approach the proficient level, students at the basic level should be able to determine which of the available data are necessary and sufficient for correct solutions and use them in problem solving. However, these eighth graders show limited skill in communicating mathematically.

Proficient Eighth-grade students performing at the proficient level should apply mathematical concepts and procedures consistently to complex problems in the five NAEP content strands. Eighth graders performing at the proficient level should be able to conjecture, defend their ideas, and give supporting examples. They should understand the connections between fractions, percents, decimals, and other mathematical topics such as algebra and functions. Students at this level are expected to have a thorough understanding of basic level arithmetic operations—an understanding sufficient for problem solving in practical situations. Quantity and spatial relations in problem solving and reasoning should be familiar to them, and they should be able to convey underlying reasoning skills beyond the level of arithmetic. They should be able to compare and contrast mathematical ideas and generate their own examples. These students should make inferences from data and graphs; apply properties of informal geometry; and accurately use the tools of technology. Students at this level should understand the process of gathering and organizing data and be able to calculate, evaluate, and communicate results within the domain of statistics and probability.

Note The following states did not satisfy one of the guidelines for school sample participation rates: Alaska, Arkansas, Colorado, Iowa, Maryland, Michigan, Montana, New York, South Carolina, Vermont, and Wisconsin.

Reading Achievement Levels–Grade 4

Basic Fourth-grade students performing at the basic level should demonstrate an understanding of the overall meaning of what they read. When reading text appropriate for fourth graders, they should be able to make relatively obvious connections between the text and their own experiences, and extend the ideas in the text by making simple inferences.

Proficient Fourth-grade students performing at the proficient level should be able to demonstrate an overall understanding of the text, providing inferential as well as literal information. When reading text appropriate to fourth grade, they should be able to extend the ideas in the text by making inferences, drawing conclusions, and making connections to their own experiences. The connection between the text and what the student infers should be clear.

Note The following states did not satisfy one of the guidelines for school sample participation rates: California, Iowa, Kansas, Massachusetts, Minnesota, Montana, New Hampshire, New York, and Wisconsin.

Reading Achievement Levels–Grade 8

Basic Eighth–grade students performing at the Basic level should demonstrate a literal understanding of what they read and be able to make some interpretations. When reading text appropriate to eighth grade, they should be able to identify specific aspects of the text that reflect overall meaning, extend the ideas in the text by making simple inferences, recognize and relate interpretations and connections among ideas in the text to personal experience, and draw conclusions based on the text.

Proficient Eighth–grade students performing at the Proficient level should be able to show an overall understanding of the text, including inferential as well as literal information. When reading text appropriate to eighth grade, they should be able to extend the ideas in the text by making clear inferences from it, by drawing conclusions, and by making connections to their own experiences—including other reading experiences. Proficient eighth–graders should be able to identify some of the devices authors use in composing text.

Note The following states did not satisfy one of the guidelines for school sample participation rates: California, Kansas, Maryland, Minnesota, Montana, New York, and Wisconsin.
